I am writing in opposition to the National Association of Broadcasters' petition 04-160. I am recent subscriber to satellite radio and have become a big fan of its variety and quality. Given the recent trend of radio stations to be owned by large companies, the value of over-the-air radio has been reduced by too much of the same. In addition I have benefited greatly from XM Radio's traffic reports. I put over 2,500 miles per month on my car and have come to rely on their traffic reports, even in and around Boston where I know where to find these reports on the radio.
